

# European Health Data Space

eHealth Policies debate, 26 October 2020

DG SANTE

European Reference Networks and Digital Health

# *Secondary use of Health Data*

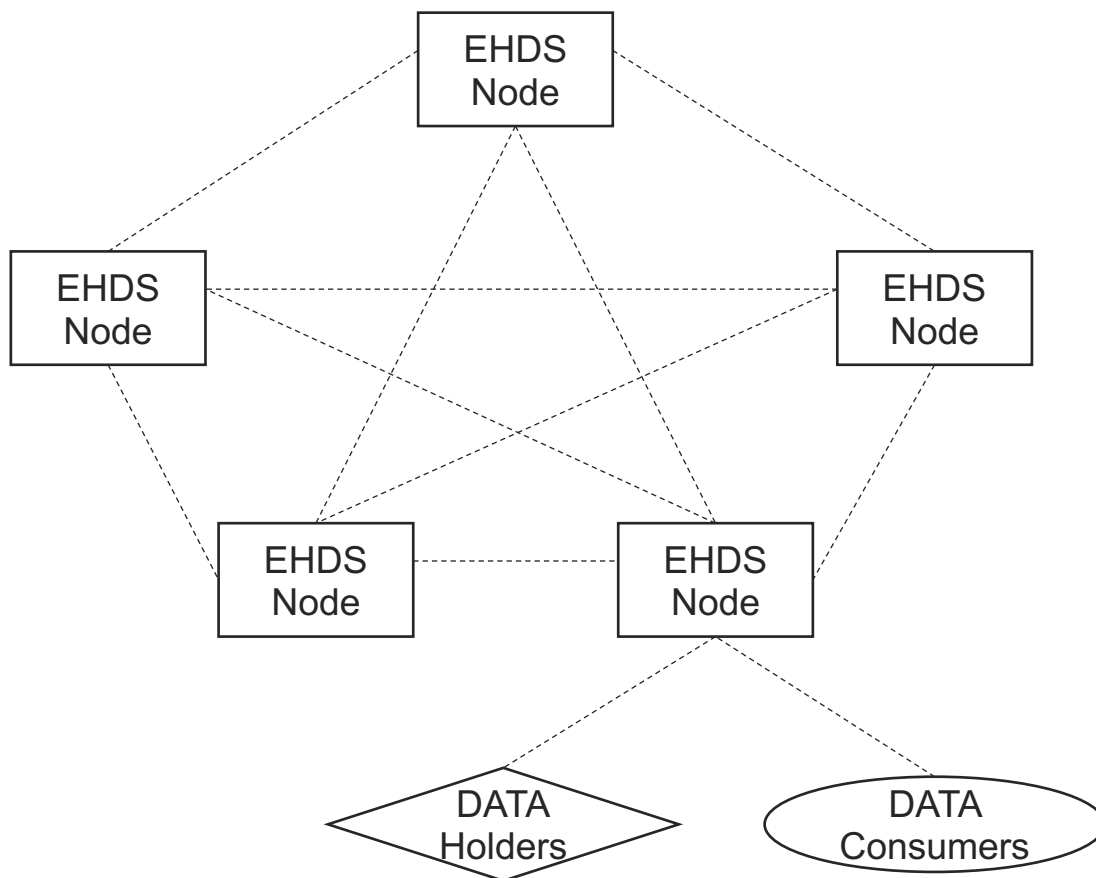

EU-wide perspective

Mission letter of  
**Stella Kiyriakides**  
Commissioner for Health

*“We need to make the most of the potential of e-health to provide high-quality healthcare and reduce inequalities. I want you to work on the creation of a **European Health Data Space** to **promote health-data exchange and support research on new preventive strategies**, as well as on **treatments, medicines, medical devices and outcomes**. As part of this, you should ensure **citizens have control over their own personal data.**”*

# EHDS concept

**EHDS nodes = *Trust Anchors***

EHDS NODEs follow common rules, policies and interoperability specifications

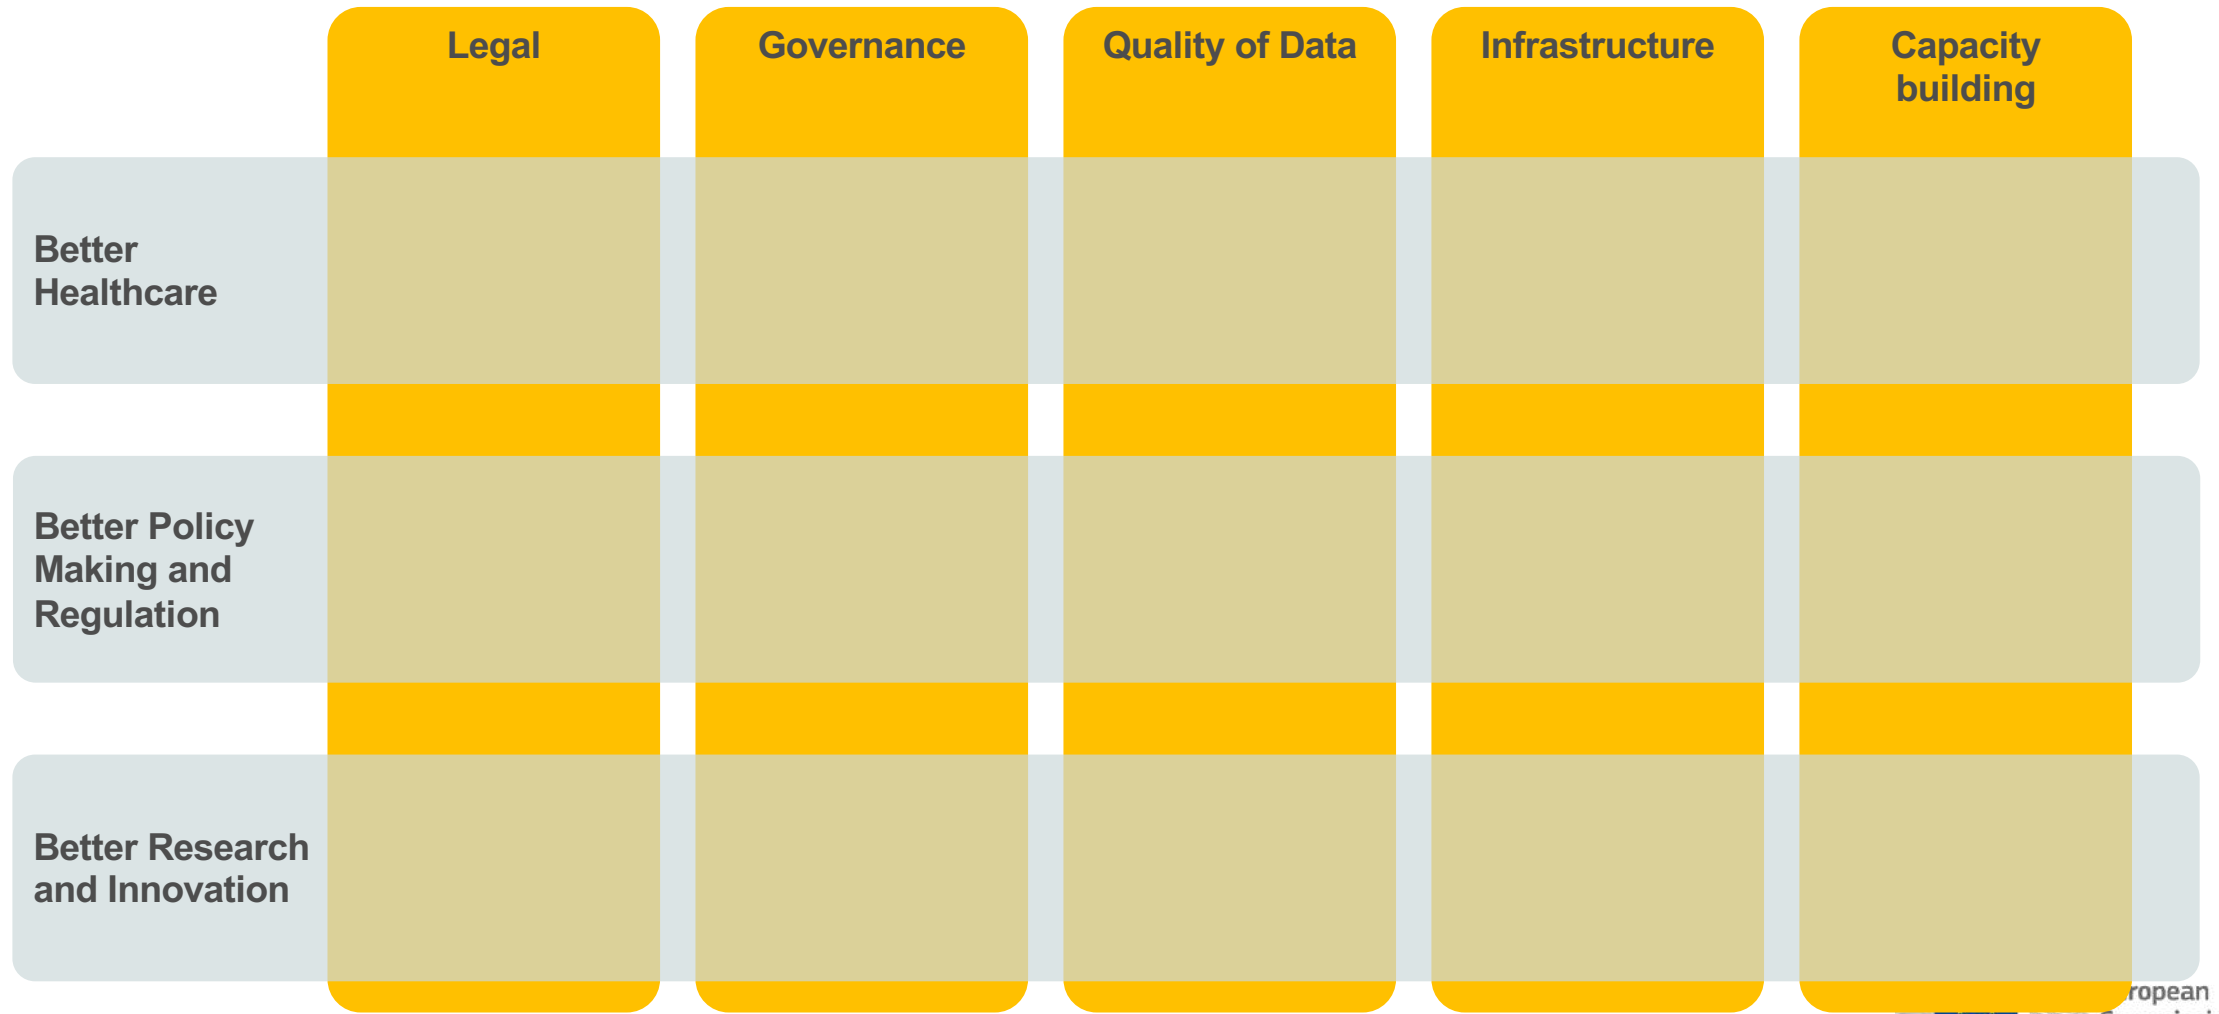

EHDS NODEs are resilient entry points for stakeholders into the EHDS

DATA Holders make health data available for secondary use

DATA Consumers further process data for research, policy making or regulation

EHDS NODEs can be established by National or Trans-national stakeholders

# European Health Data Space - Framework

# Success stories

**We are looking for  
Use Cases relying**

Secondary use  
of data

Using  
aggregated data

# Questions?

# Challenges?

# Suggestions?
