P2GreenEST

Supporting EU SMEs in the field of circular economy to participate in public procurement in Eastern countries

Co-funded by the
COSME programme
of the European Union

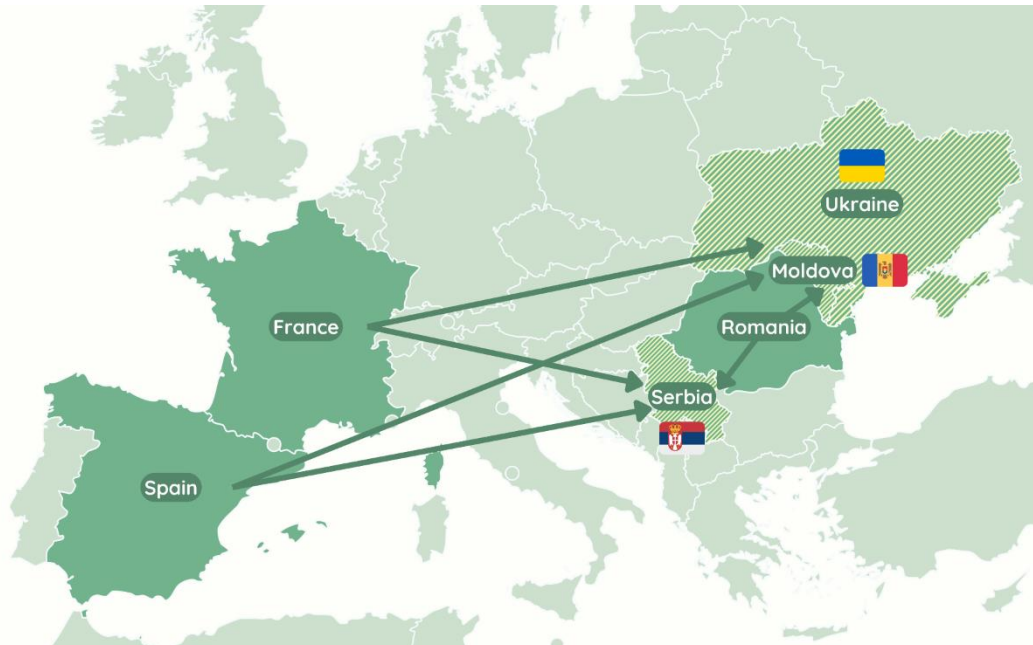

Who we are

Co-funded by the COSME programme of the European Union

Because great ideas do not understand borders...

We support innovative European SMEs to participate in circular public procurement in the Eastern Partnership countries by introducing them as actors in public market opportunities in **Moldova, Serbia and Ukraine**.

Coordinating the project, Ea éco-entreprises is a cluster of enterprises from France (région Sud). It gathers in majority SMEs, working on circular economy topics such as water, waste and energy, biodiversity, sites and polluted soils, Nature Based Solutions.

Green Energy Innovative Biomass Cluster has the aim to raise interest towards the production and utilization of the biomass, the most important renewable energy source in Romania.

The Asturian Federation of Entrepreneurs represents 55.000 companies and self-employed workers in Asturias (Spain). In particular, 79 territorial and sectorial business associations and 66 singular companies. Founded in 1977, its guiding principle is entrepreneurial unity.

The Chamber of Commerce and Industry of the Republic of Moldova is a non-governmental and non-profit organization, which was created to represent, support and protect the common concerns of its members and of the entire business community in close cooperation with state authorities and other national and foreign institutions.
