

Clusters meet Regions

Pitching session October 23, 2023

Who we are

- **Cluster** operating in the field of technologies for water works, water and waste management and renewable energy sources.
- Based in Brno in the Czech Republic and its activities include regions that belong to the Morava river basin and beyond (especially South Moravian Region).
- Members of the cluster jointly participate in research, development of innovative products, promotion of the field, presentations and implementation of projects in the Czech Republic and in the world.
- Specialized market segments include **hydropower**, **water infrastructure safety**, **sediment** treatment and use, **agriculture** and diving work.

Projects

Examples of collective research projects (2023):

- Web-based application for measuring urban drainage system
- Digital twin of dam
- Sediments – Breakwaters

Examples of active European projects (2023):

- euWater4i-SD (COSME)
 - support for the internationalization of SMEs to Latin America and Eastern Africa
- PoVE Water Upscaling (Erasmus+)
 - Platform of Vocational Education
- CirclnWater (Euroclusters)
 - Supporting European SMEs to bring water-smart solutions to market
- Water4All (Horizon Europe)
 - Water4All Partnership - Water Security for the Planet

CirclnWater

Supporting European SMEs to bring water-smart solutions to market

What are we looking for

- New project opportunities
- New partners
- Inspiration
- Good practices
