

Taiwan Machine Tool & Accessory Industry

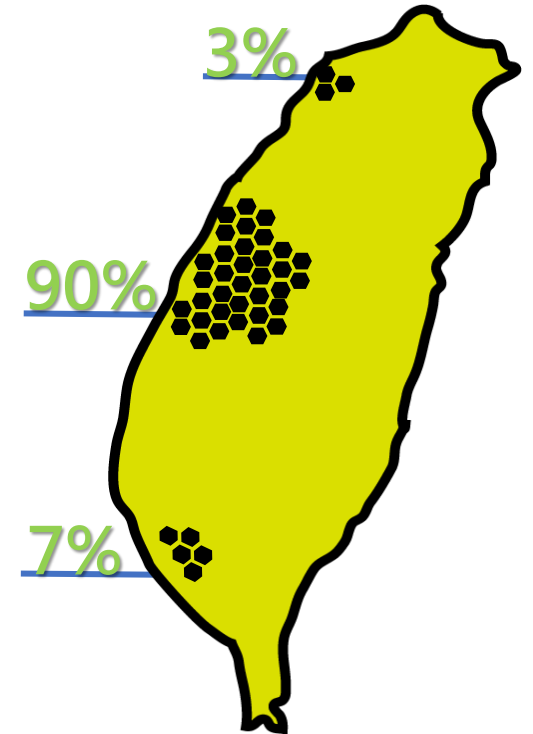

台灣工具機暨零組件工業同業公會
Taiwan Machine Tool & Accessory Builders' Association

Taiwan Machine Tool & Accessory Builders' Association

- **Location:** Taichung City, Taiwan
- **Year of foundation:** 2007
- **No. of members:** 762, including machine tool builders and accessory builders
- **Sector of activity:** Machine Tool industry
- **Cluster mission:** As an industrial association representing majority of machine tool businesses in Taiwan, TMBA is dedicated to facilitate the development of Taiwan Machine Tool Industry and governmental assignments, assist in developing overseas market, conduct industry statistics and market research, facilitate member communications, and organize Taiwan International Machine Tool Show (TMTS).
- **2021 World machine tool ranking:** 5th for Exporters, 7th for Producers, 9th for Consumers

Cooperation between Europe and Taiwan

1. The member companies of TMBA, namely YCM, TONGTAI, HWIN, FFG Group, and Litz, have been collaborating with EU member countries in recent years through various means such as mutual investment and OEM, etc.
2. Taiwan's machine tool equipment has been increasingly favored by European manufacturers, with an average annual growth rate of 35% over the past two years.
3. As a result of the gradual shift in exports towards Europe, Taiwanese manufacturers have been establishing technical service centers or shipping warehouses in the European region.
4. Taiwanese machine tool products have successfully penetrated the supply chains of various industries, including aerospace (Airbus, Siemens), automotive (Porsche, Maserati, Jaguar, Aston Martin), and wind power (Siemens Gamesa, Nordex, Enercon).
5. Taiwanese companies, such as YCM, Buffalo, and TONGTAI, have adopted the UMATI communication standard operated by VDW, making it convenient for European manufacturers to integrate Taiwanese products into their automated or intelligent equipment.
