Foster the feminization of industrial sectors with French clusters

Thought our book of 16 interviews of female managers/presidents of french clusters

Elise DUREY
Project Manager,
France Clusters

SOME FINDINGS

1. Unsurprisingly,
gender equity is
not reached at all

2. Division
within job
occupation

3. Difference
of wage

4. Lack of
female
representativity
in education

So... What can cluster do about it?

1. Foster the presence of young women in scientific and technical training and therefore rebalance the gender parity in education
2. Promote the image of industry to change people vision and attract skilled profiles
3. Developing female entrepreneurship

**Each action counts,
each word counts,
each initiative counts
!**

CONCLUSIONS

1. Finding financial support to translate our book in English

2. And support action plan for gender equity in cluster

**Wishing to
go further**
