

Cluster Lombardo
Scienze della vita

Who We Are

The Cluster is the community dedicated to life sciences in Lombardy Region

It brings together public and private players in the diagnostics, advanced therapies, pharmaceuticals, medical devices and healthcare technologies areas to foster progress in this sector in Lombardy and to create new business opportunities for its members.

It is one of the 9 technological Cluster of Lombardy Region and it is a member of the Italian life science Cluster ALISEI.

Mission

CREATE AN ECOSYSTEM WHERE RESEARCH TURNS INTO INNOVATION

Promote and improve, even in the context of the Lombardy Region's smart specialization strategy for research and innovation, the life sciences system focusing on:

medical devices

biotechnology

pharmaceutical

healthcare and wellbeing

digital health

Strategy

The **Cluster** strategy is based on three main streams:

RESEARCH AND OPEN INNOVATION

EXPERIENCE SHARING & COMMUNITY

ACCOUNTABILITY

Services

- Promoting the **Region** as a R&I excellence hub
- Fostering **technology transfer** process
- Supporting members in the development and implementation of **common projects**
- Helping to create a stronger **life sciences community** in Lombardy fostering communication and know-how sharing
- Promoting the regional **hub** at national and international level
- Accounting for Lombardy life sciences **issues** with regional and Italian public institutions
- Providing support to **set priority areas** in life sciences at regional, Italian and European level
