

Trade mission to Mexico

Go international in Latin America

Mexico City | Mexico

From 4th until 6th of September 2023

euWater4i-SD is pleased to invite you to join for its trade mission to Mexico in early September 2023.

This business trip was planned to coincide with the exhibition dates of **Aquatech Mexico**, Mexico's largest exhibition for process, drinking and wastewater, in the Centro Citibanamex of Mexico City.

The fact that **Green Expo Mexico**, **Intersolar Mexico** and **Mexico WindPower** will also be held at the same time and place only confirms that this will be the place to be for all companies wishing to do business in Latin America.

However, the first trade mission to Bolivia showed us that a successful mission also involves direct meetings and presentations

of our companies. This is why we are also planning **high-profile meetings** and a **networking event**. See the **programme** on the next page for more details.

As always, we offer our financial support to European SMEs by covering up to **€1,500** per company for their travel expenses. Make sure to register early to benefit from the support.

Finally, please keep in mind that you are free to stay longer than planned in the official programme and to organise your own meetings. Take advantage of the opportunity to explore your **market opportunities** on site and to make contact with experts and business players.

We look forward to your participation!
